

PHOTO ANALYSIS WORKSHEET 1

Look at the photo(s) carefully and make some notes about what you see. Consider:

- What is the main subject of the photo? What is immediately obvious?
- What do you notice in the background? Small details aren't always obvious straight away.
- What does the photo suggest about:
 - the economy – information about the type of work people do; the equipment they use?
 - society – information about people; about activities and equipment used for daily tasks like cooking, cleaning, entertainment; about their homes, schools, shops?
 - the environment in that place – the natural environment; the built environment; evidence of changes made by people; waste or damage to the environment?

Remember, not all photos will have all of this information in them.

Main subject of the photo:			
Background details:			
What does it suggest about:			
the economy	society	the environment	
What questions do you have about that place and the people who live and work there?
